

“Bridging the IT / RIM Gap”

Melissa Suek

Melissa Suek is an Advisory Senior Associate with PWC PricewaterhouseCoopers and has over 10 years of professional experience in the areas of information management, organization change, and process analysis and improvement. Ms. Suek assists clients in the assessment, design and implementation of records management programs, including policy, procedures, retention schedules, technology, training, and communications.

Ms. Suek has experience managing project teams, gathering business requirements, documenting business processes including risks and controls, developing archiving solutions for structured database and unstructured data environments, and analyzing business use of social media. Ms. Suek holds a BA in Communication Studies from the University of Minnesota, and an MBA and MS in Management of Information Systems from Iowa State University.

Brian Fox

Brian Fox is a Director in the Forensics practice at PWC PricewaterhouseCoopers. He consults with major corporations in the identification, collection, analysis and management of large volumes of data, whether paper or electronic. He has extensive experience scoping and executing preservation efforts, including analysis of electronic data and presenting that analysis to corporate boards, adversaries and/or the government.

Mr. Fox consults with clients on both reactive and proactive records and information practices, from assisting with responding to a legal or regulatory crisis, to better preparing for the next serious matter through improved discovery and records and information management practices. He has led a variety of engagements including breach investigations, e-discovery, forensic preservation, 30(b)(6) witness preparation, data mapping, complex data analysis, records and information management program design and execution, and creating retention policies and disposition procedures. Mr. Fox holds a BA in English from Whitman College, and is an EnCase® Certified Examiner.
